Islamabad, Pakistan | +92 311 5939553 | [Gmail](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Systems Engineering graduate and Google Data Analytics Certificate holder with hands on experience building cloud based ETL/ELT pipelines on Microsoft Azure and AWS, SQL driven reporting, and Python data automation. Independently delivered pipelines processing over a million records and a full stack computer vision system using YOLOv8 and EasyOCR. Proactive, self-driven learner seeking an entry level Data Engineering / Analytics role.

EXPERIENCE

Freelance Data & AI Lead-Generation Specialist — Fiverr

Aug 2025 - Present

- Manage end-to-end client coordination for an AI-powered lead-generation service, including gathering requirements, tracking deliverables, and reporting results directly to clients.
- Evaluated automation tool integrations (n8n, Make, Zapier) to expand service offerings, demonstrating quick, self-directed adoption of new platforms.

Management Team — Coders Nexus, UET Peshawar

Jun 2023 - Dec 2024

- Helped coordinate coding workshops and technical knowledge sharing sessions, supporting outreach and peer engagement within the developer community.

TECHNICAL PROJECTS

Olympic ETL Azure Pipeline

[Link](#)

Azure Data Factory · ADLS Gen2 · SQL · Power BI · PySpark (Python)

- Built an Azure ETL pipeline processing 1M+ Olympic athlete records into ADLS Gen2 and Power BI dashboards, cutting manual data-prep time by an estimated 5 hours through automated mapping data flows.

SQL Restaurant Order Analysis

[Link](#)

MySQL · Joins · Aggregations · CTEs · Window Functions

- Analyzed 12K+ restaurant orders using advanced SQL (CTEs, window functions, subqueries), producing reporting on top-revenue items and peak ordering hours to support business decisions.

E-Commerce Data Azure Pipeline

[Link](#)

Azure Data Factory · Azure SQL · Python

- Automated e-commerce transaction ingestion into Azure SQL via scheduled ADF triggers, eliminating manual daily upload tasks for a simulated 10K-record dataset.

Last.fm Music API — AWS ETL Pipeline

[Link](#)

Python · REST API · AWS S3 · AWS Glue · Pandas

- Developed a Python ETL pipeline pulling 50K+ track records via the Last.fm REST API, transforming with Pandas and loading into AWS S3 for downstream analytics.

EDUCATION

University of Engineering & Technology, Peshawar

Oct 2022 - Jul 2026

BSc Computer Systems Engineering

- Final Year Project: AI-Powered Smart Traffic Management System — real-time vehicle detection and automated license-plate recognition using YOLOv8, EasyOCR, and a Django/SQLite backend with a Tailwind CSS frontend and automated PDF reporting.
- Relevant coursework: Database Systems, Cloud Computing, Data Structures & Algorithms, Software Engineering.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, PySpark), HTML/CSS, JavaScript, SQL

Cloud & Data Engineering: Microsoft Azure (Data Factory, ADLS Gen2, Azure SQL), AWS (S3, Glue, Athena), Data Modelling (Star Schema), Databricks, Snowflake

Databases: MySQL, PostgreSQL

Visualization & BI: Power BI, Microsoft Excel

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

CERTIFICATIONS

- Google Data Analytics Certificate — Coursera / Google
- IBM Data Analytics Professional Certificate — Coursera / IBM
- SQL for Data Analysis, Python for Data Science, Data Analysis with Excel — DataCamp
